The Manager of Pharmacy Operations stated that earlier this year an inventory of CS products disclosed a shortage of a total of about 1,000 d.u. of oxycodone 15 mg and 30 mg product. He said that a subsequent required drug screening of all the pharmacy staff disclosed that a CPhT tested positive for oxycodone. This CPhT subsequently quit. A DEA Form 106 was filed and the State Board of Pharmacy was notified. A local police warrant has been issued for the CPhT. The local DEA office sent a representative to interview the PIC concerning the matter. No further contact by either the DEA or Board of Pharmacy has occurred to date.

During the QRA site visit that occurred 07/29/2014, PIC disclosed that during a routine inventory of CS this year, a shortage of approximately 1000 DU of DF9143 was discovered (see AF1585922-110-D-072914). PIC stated that as part of the investigation into the shortage, a subsequent employee drug screening revealed that a CPhT tested positive for narcotics. The employee resigned. PIC further stated that the proper theft and loss notification was made to state and federal regulatory agencies. PIC also stated that an arrest warrant for the technician was issued. On September 16, 2014 Fruth Corporation Loss Prevention advised CAH that camera angles in the pharmacy were adjusted. In addition, regular c/s inventories per Fruth policy will continue. The customer may continue to purchase controlled substances.
